22 July 1978

Note for the DCI

25X1

FROM: [   ]

SUBJECT: Issue Papers

1. Attached are the final issue packages. As we discussed, I recommend you address the CCP first.

2. You will find the Imagery Program Paper is a good introduction to the NRP. I suggest you read it before dealing with the specific issues presented as NRP options.

3. The CIA Program Package stands on its own; although, you will have already seen the SAFE paper and the IDEX issue is discussed as part of Imagery as well.

4. The final element of this parcel is a Production Cross Program assessment. It does not require that you choose among any alternatives. I have elected to include it as background and because we have discussed some of the data.
